WebProgramming Python and JavaScript

PROFESSIONAL SUMMARY/ PROJECTS EXECUTED

I created an app to generate QR codes using JavaScript.

I have developed an application where you can view the weather conditions of each country.

I developed a website where you can search for Pokemon using the Pokemon API.

I developed a sound pad using JavaScript that features a variety of sounds from different instruments

As part of a class project, I developed a shopping cart where users can select products and store them for

I developed a blog and a tourism webpage using JavaScript, CSS, HTML, and Bootstrap, and also developed my curriculum using React and the other with Sass.

I created a web form that validates user input to prevent the submission of incorrect information to the server. My other projects are available on my website and GitHub.
